PCS-THE RIGHT CHOICE

Since its founding in 1904, PCS has offered the best and widest range of proactive solutions to the pest management industry. From its beginnings as a manufacturer and distributor of sheep and cattle dips for use in the Chicago stockyards, through its gradual expansion into the sale of rodenticides and insecticides, PCS continues to meet and exceed your expectations by providing the right resources, technology, and innovative pest management products to deliver bottom line results to your company.

PCS is truly a client-driven organization. We are driven by two fundamental business values:

- Everything we do is aimed at exceeding our customer's expectations – always.
- We are a family owned organization. Rather than focusing on dividends for our public stockholders, PCS interests lie with increasing our client's profitability and reducing risk.

What that means for you and your business is that you can depend on PCS to supply your company with cutting edge pest management products and tools.

PEST CONTROL SUPPLIES

Why PCS?

PCS offers products designed to protect our clients:

- Environment
- Reputation and Brand
- Employees, visitors, and consumers of our client's products and services, and health and safety
- Business alliances and contracts

Guarantee

PCS guarantees that we will meet or exceed your expectations by providing the right resources, technology, and innovative pest management methods to deliver bottom line results to your company.

As a PCS client you are entitled to the following rights:

- To be treated fairly and with respect at all times
- To have your questions answered in an honest, straight-forward manner
- To have your expectations met or exceeded
- To have full access to customer service
- To have any issues of concern responsibly addressed in a timely manner

Industry Leaders

Since our beginning in 1904, PCS has historically employed pioneers and leaders in the pest management industry. We are active in the National Pest Management Association (NPMA) and other state associations. PCS technical staff has helped spearhead the development of laws, regulations, and industry standards with the needs and concerns of our clients in mind.

Technical Support

PCS technical staff is comprised of knowledgeable individuals in the disciplines of entomology, wildlife biology, food safety, and ornamental and turf management. Members have served on the boards of various state and national pest management associations and trade organizations, and have over 150 years of combined pest management experience. The PCS technical staff utilizes their extensive industry knowledge in all facets of client services.

Environmental Statement

At PCS our strategy is to implement environmental management practices that enhance both ecology and efficiency. We take our cues from nature not only in the design of our pest management programs, but also in our corporate philosophy. As a result, we approach solving pest management issues within the context of the natural ecology by exploring and implementing innovative alternatives to traditional pesticides.

In order to protect the health and safety of our clients, their employees and customers, and the integrity of our client's brands, PCS strives to lessen the negative impact on the environment arising from our business activities and to encourage an ecological mindset within our staff. We emphasize the need for our people to wisely use resources by training them in proper use and disposal of environmentally sensitive materials, in conjunction with minimizing the overall use of these materials in our operations, giving equal consideration to the material's impact on:

- The safety of the people effected by it
- Efficacy
- The environment

PCS assures leadership in environmental care by operating in compliance with applicable safety and environmental regulations and laws, and by exceeding regulatory requirements in both degree and timing wherever possible.

We respect the earth on which we are all dependent. We value our society, the communities where our customers and employees live, and we value the quality of the world which future generations will inherit.

State-certified training seminars

PCS offers training courses that meet health department requirements including the state of Illinois and the city of Chicago. Attendees may apply for Illinois and Chicago certification after completing the required 15 hours of food safety training and successfully completing the examination. A one day training course is also offered that meets the five year recertification requirements for Illinois and Chicago. Customized training is available for groups of ten or more.

Inventory and Same Day shipment

In most cases orders are shipped on the same day received. Our inventory is maintained at peak efficiency and quantity of product for exceptionally fast turn around.

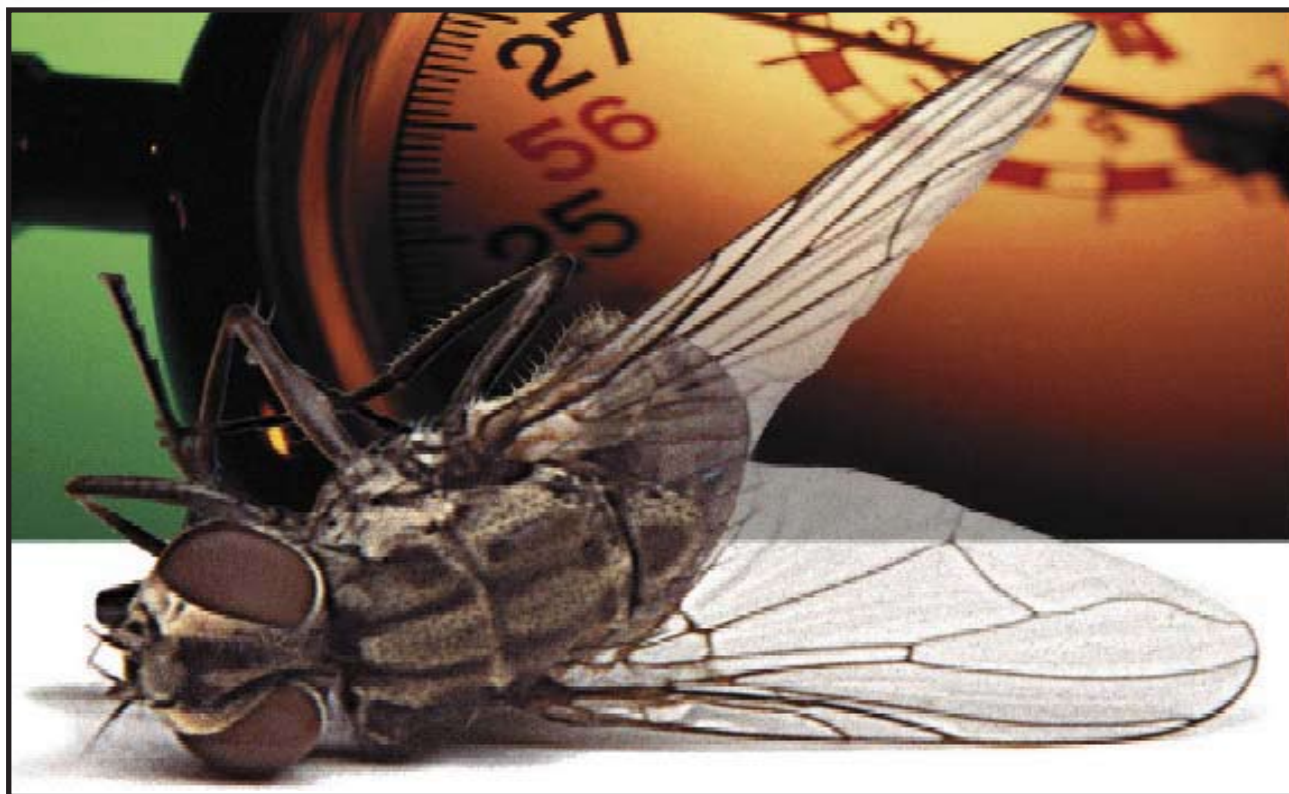

www.pcspest.com

Our website features product information, links to manufacturers and entomological websites, and labels and material safety data information.

Bayer Environmental Science

MAXFORCE GRANULAR FLY BAIT™

**The average life span of a housefly is 21 days.
After eating Maxforce Granular Fly Bait™, it's 60 seconds.**

✓ **Yes, it really works that fast**

New Maxforce Granular Fly Bait contains two powerful attractants combined with imidacloprid, a new active ingredient for the control of flies that is non-repellent and works quickly – even against flies resistant to OP and carbamate insecticides.

✓ **Controls flies for up to 30 days**

Works from one call to the next for monthly-serviced accounts.

✓ **Easy to Apply**

Versatile and ready-to-use in 5 or 40 lb. plastic pails. Apply as a broadcast application, place in bait stations, or dissolve in water and paint on surfaces.

✓ **Broad Label**

Maxforce Granular Fly Bait quickly controls nuisance flies around commercial facilities such as food processing and beverage plants, as well as restaurants, bakeries, supermarkets, warehouses, dumpsters, dairy, meat and poultry processing plants.

✓ **Responsible**

With just 0.5% active and low toxicity to non-target animals, Maxforce Granular Fly Bait also contains Bitrex® bittering agent to help prevent accidental ingestion by children and pets.

✓ **Available in early 2003**

For information call your Bayer Environmental Science sales representative or call 1-800-843-1702.

ACHIEVING 100% TERMITE CONTROL. THE STORY OF TERMIDOR®

Today, there's a remarkable new option in termite control offering 100% control in 3 months or less for 5 years. It's Termidor® Termiticide/Insecticide.

100% EFFECTIVE. Termidor has been subject to some of the toughest tests in history and has passed them all with flying colors. USDA field trials conducted in 4 states showed unprecedented 100% control after 8-plus years. More than 150 different US single family homes and apartments treated with Termidor under Experimental Use Permit authorization remain 100% termite-free. And, since Termidor was registered by the EPA in March 2000, more than 700,000 U.S. homes infested with termites have been treated with it.

Termidor works at very low application rates containing 0.06% fipronil. Termidor is lethal to termites by both ingestion and contact. It is non-repellent, so termites, unaware of its presence, ingest it and bring it back to the colony on their

bodies, transferring it to other termites. The combination of ingestion, contact, and transfer controls termites in just 3 months - or less.

FOR FIVE YEARS. When Termidor is applied properly by trained professionals, according to the label, we pledge to our Partners that the site will stay termite-free for 5 years. In the highly unlikely event that it doesn't, we'll pay for the labor and materials to retreat. Termidor was the first termiticide to make this commitment.

BECOME OUR PARTNER. If you're not a Termidor Certified Professional, please visit www.termidoronline.com to complete the Termidor Training and learn more about our Partners Program.

For more details, contact your Termidor sales representative or call 1-877-Termidor.

TERMIDOR®

IF YOU'RE NOT ASKING FOR TERMIDOR,
YOU'RE ASKING FOR TROUBLE.

INSECT MANAGMENT

Successful integrated pest management programs utilize a systematic, information intensive, approach that is dependent on understanding and monitoring your customer's environment. For residential and commercial application, PCS supplies the right products for cutting edge insect management.

Aerosols

Air-Devil HPX:

0.1% cypermethrin residual aerosol. 6 x 14oz. **order code: AIRDH**

CB Borid Turbo:

0.2% Orthoboric Acid.
12 x 16 oz. **order code: CBBA**

CB-80 Extra:

0.5% Pyrethrin, 4% Piperonyl Butoxide. Non-residual.
8 x 17 oz. **order code: CB80X**

D-Force HPX:

0.06% Deltamethrin. Residual.
6 x 14 oz. **order code: DFORH**

1000 TDC:

Battery-operated metered aerosol dispenser unit. Handles 30-day aerosol cans. 8/cs. **order code: 1000**

Clear Zone:

Metered non-residual aerosol. Each can lasts approx. 32 days. Contains 1% pyrethrin.
12 x 6.4 oz. **order code: CZ3**

Purge 1 Clean Air:

12 x 6.4 oz. **order code: P176**

Intruder HPX:

0.1% cyfluthrin, 0.05% pyrethrin, 1.0% PB. Residual. 6 x 14 oz.
order code: INTH

Invader HPX:

1% Baygon residual aerosol.
6 x 14 oz. **order code: INTV**

Gentrol Aerosol:

Aerosol with methoprene for roaches and drain flies.
12 x 16 oz. **order code: GEN**

Precor® Plus Fogger:

Total release aerosol for fleas with adulticide and IGR. 0.50% Permethrin, 0.15% methoprene.
12 x 6 oz. **order code: PRET**

Precor® 2000:

Adulticide with IGR for fleas. 0.58% Permethrin, 0.09% S-methoprene.
12 x 16 oz. **order code: 2000**

PT 221L®:

0.05% lambda-cyhalothrin. Residual.
12 x 17.5 oz. **order code: 221L**

PT 565 Plus XLO®:

0.25% pyrethrin, 0.25% d-trans allethrin, 1% PBO, 1% MGK-264. Non-residual. 12 x 20 oz.
order code: 565X

Cy-Kick®:

0.1% cyfluthrin. Residual.
12 x 17.5 oz. **order code: CYKICK**

Instant Soap 'n Water®:

12 x 9 oz. **order code: ISW**

Microcare®:

Microencapsulated Pyrethrin 0.3%, 2.2% PBO, 0.336% MGK-264. Residual.
12 x 20 oz. **order code: MIC**

Aerosols (continued)

Orthene®:

Contains 1.0% Orthene. Residual.
12 x 18 oz. **order code: ORT**

P.I.:

0.5% pyrethrum, 4% PBO. Non-residual. 12 x 18 oz. **order code: PTPI**

Perma-Dust®:

35.5% Boric Acid C&C Treatment. Residual. 12 x 9 oz. **order code: PTPD**

Pro-Control:

Total release non-residual with 0.5% pyrethrin, 2.5% PB, and 2.5% MGK-264. 12 x 6 oz. **order code: PC6**

Pro-Control Plus:

Total release residual with 0.5% cyfluthrin, 0.5% pyrethrin, 2.5% PB, and 2.5% MGK-264. 12 x 6 oz.
order code: PC4

Tri-Die®:

0.6 % Pyrethrum, 4.8% PBO, 8% Silica C&C Treatment. Residual. 12 x 8 oz. **order code: TRID**

Ultracide™:

Flea control spray w/0.05% pyrethrin and 0.4% permethrin adulticides and 0.1% Nylar IGR. 12 x 20 oz. **order code: ULT**

Wasp-Freeze®:

0.25% Dual Pyrethroid Formula. Kills wasps instantly. 12 x 17.5 oz.
order code: WASP

Baits

Advance Granular Ant Bait:

0.011% Abamectin.
6 x 12 oz; 4 x 6# pail
order code: ADV12, ADV6

Advance Carpenter Ant Bait:

Granular 0.011% Abamectin.
12 x 8 oz; 4 x 2# jug
order code: ADV8, ADVC

Advance

375A Select Ant Bait:

0.011% Abamectin.
12 x 8 oz; 4 x 2# jug
order code: ADVS8, ADVS2

Advance Dual Choice

Ant Bait:

Ant bait stations with Abamectin. 72 stations/bag. 72 stn/bag
order code: ADVD

Advance 388B Ant Gel Bait:

5.4% Borax. 4 x 30 g
order code: ADVAG

Avert Dry Flowable:

0.05% Abamectin powdered cockroach bait, in squeeze tubes.
12 x 30 g. **order code: AVERTD**

Avert Gel Formula 2 (Piston Can):

Bait gel containing abamectin, in pressurized can. 6 x 120 g.
order code: AVERTG

Avert Gel Formula 3 (Reservoir):

Avert Gel in cartridges.
4 x 30 g. **order code: AVERTR**

Baits (continued)

InTice Ant Gel:

Ant gel bait w/boric acid.
5 x 1.5 oz. **order code: INAG**

InTice Thiquid:

Effective syrup bait. Attracts a wide range of ants. 4 oz.; 1 gal.
order code: INTT4, INTTG

InTice Granular Bait:

Granular bait w/boric acid for control of ants, cockroaches, crickets, mole crickets and silverfish.
12 x 1#; 4 x 5#.

order code: INTG5, INTG40

Cockroach Baits

Advance Cockroach Gel Bait:

Dinotefuran .5%. 4x30 gram cartridge.
order code: ADVCR

InTice Cockroach Gel Bait:

Orthoboric acid 30%. 5x30 gram cartridge. **order code: INTR**

MaxForce FC Select:

For bait averse roaches. Fipronil .01%.
4x30 gram cartridge. **order code: MAXSC**

MaxForce Magnum:

Roach killer bait gel. .05% Fipronil. 4x30 gram cartridge. **order code: MAXMC**

Vendetta:

Cockroach gel bait. Abemectin 0.05%.
4x30 gram cartridge. **order code: VEND**

New InTice™ Baits from Rockwell Labs They'll Die for the Taste!

InTice Select Ant Granules

A proprietary blend of six attractants ants love in a mold and moisture resistant granule, with a perfect blend of particle sizes for ants.

InTice Sweet Ant Gel

An unsurpassed, super-sweet formula ants will die for in a thick gel that won't drip, with a humectant to keep the bait soft and accessible to ants longer.

InTice Granular Bait

A broad spectrum bait for ants, roaches, crickets, mole crickets and silverfish in a weather-resistant, 'triple-attraction' granule with sweet, oil and protein for optimal acceptance and control.

Baits (continued)

Maxforce STATIONS:

Pre-packaged bait station for roaches w/ hydramethylnon. 72/bag. **order code: MAXS**

Maxforce Gel:

Bait in syringe or cart. for roaches, with hydramethylnon. 4 x 30g cart. for bait gun. **order code: MAX**

Maxforce Granules:

Granular bait for ant control. 12 x 10 oz.; 4 x 6#; 25#. **order code: MAX10, MAX6**

Maxforce Fine Granules:

Fine granular bait for ant control. 12 x 10 oz.; 4 x 6#. **order code: MAX10F, MAX6F**

Maxforce Pharoah Ant: Bait station for ants w/hydramethylnon. 24/bag. **order code: MAXP**

Maxforce FC:

Pre-packaged bait station for roaches w/ fipronil. 72/bag, regular; 96/cs, large. **order code: MAXFC**

Maxforce FC Gel: Bait in syringe or cartridge for roaches w/fipronil. 3 x 60g syringe; 4 x 30g cart. for bait gun. **order code: MAXC, MAXG**

Maxforce Ant Gel: Fipronil for ants. 4 x 30g cart. for bait gun. **order code: MAXAG**

Maxforce Carpenter Ant Gel:

Fipronil for carpenter ants. 4 x 30g cart. for bait gun. **order code: MAXCA**

Maxforce FC Pharoah Ant:

Bait station for ants w/fipronil. 24/bag. **order code: MAXPFC**

Maxforce Granular Fly Bait:

Can be applied broadcast, in bait stations, or dissolved in water and painted on surfaces. Uses imidacloprid. 5#; 40#. **order code: MAXFLY, MAXFLYB**

Maxforce Fly Spot Bait:

To spray or paint on surfaces. Imidacloprid 10%. 50 x 2 oz packets; 6x1 lb container. **order code: MAXFLYP, MAXFLYS**

Quickstrike:

Fly strip with nithiazine; includes two food attractants and a pheromone attractant. 12 x 2 strips/case **order code: QUIK**

DROP YOUR GUN

Introducing Siege® PBS™.
 A Revolutionary New Way to Wipe Out
 Whole Roach Populations in a Week.

- No guns. No syringes. No hassles.
- Pressurized Baiting System for perfect application every time.

Concentrates

Archer:

IGR containing pyriproxyfen (Nylar), is effective on fleas and roaches. 8 x 16 oz. **order code: ARC**

Bora-Care:

Non-leaching glycol-based borate wood treatment. 4 x 1 gal. **order code: BORG**

Catalyst:

Propetamphos; can only be used in commercial accounts. 16 oz. **order code: CATP**

Conquer EC:

3.48% Esfenvalerate; liberal label. 12 x 1 pt. **order code: CONEC**

Cy-Kick CS:

Microencapsulated cyfluthrin. 6 x 1 pt.; 4 x 120 oz. **order code: CYKP, CYK**

Demand CS:

Lambda-cyhalothrin. Good residual. 8 x 8 oz.; 8 x 1 qt. **order code: DEMCS, DEMQ**

Demon WP:

6 x 1#; 12 x 12 pkt. **order code: DEM, DEMWP**

Demon MAX:

Termiticide/Insecticide with Cypermethrin. 8 x 16 oz.; 4 x 1 gal. **order code: DEMEC, DEMTC**

EC 96:

0.96% Pyrethrin, 9.6% Piperonyl Butoxide. 4 x 1 gal. **order code: 96G**

Exciter:

6.0% Pyrethrin, 60.0% Piperonyl Butoxide. 8 x 1 pt. **order code: EXC**

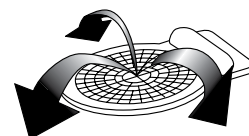

Gentrol:

Insect growth regulator with hydroxyurea. 10 x 1 oz.; 6 x 1 pt. **order code: GENT, GENP**

Gentrol Point Source:

Convenient delivery system for Gentrol; simple-to-place devices cover up to 75 sq. ft. 20 ea. per box. 6 box/cs. **order code: GENP5**

Kicker:

6.0% Pyrethrin, 60.0% Piperonyl Butoxide. Excellent fogging & flushing. 8 x 1 pt. **order code: KICK**

Malathion 5 lb. EC:

An emulsifiable concentrate containing 5 lbs. Malathion per gallon. 4 x 1 gal. **order code: MALP**

Mop Up:

Soluble boric acid solution for applying to floors. 4 x 5 lb.; 25 lb. **order code: MU5, MU25**

Orthene PCO Pellets:

Low-odor formulation effective against resistant German cockroaches. 10 packets per carton. 12 ctn./case. **order code: ORT2**

Phantom:

Non-repellant termiticide/insecticide. Inside application. Contains Chlorfenapyr. 4 x 21 oz. **order code: PHA21**

Prelude:

General-use emulsifiable concentrate; labeled for fleas. 8 x 1 qt. **order code: PREQ**

Precor:

Insect growth regulator. 10 x 1 oz.; 6 x 1 pt. **order code: PREP, PRECP**

Concentrates (continued)

Suspend:

Suspended crystal Deltamethrin.
16 x 1 pt.; 4 x 1 gal.

order code: SUS, SUSG

Tempo Ultra WP:

General purpose WP w/beta-cyfluthrin. 6 x 420 g jar;
4 x 8 x 50 g PowerPak.

order code: TEM, TEMWP

Tempo SC Ultra:

beta-cyfluthrin. 12 x 240 ml

order code: TEMSC

TIM-BOR®:

Disodium Octaborate Tetrahydrate.
25 lb pail; 8 x 1.5 lb.

Generation™
20 lb. pail

After 320 placements.

Competing brand,
20 lb. pail

After 320 placements.

Generation mini-blocks may be only three-quarters of an ounce, but they pack one powerful punch. Each block features our exclusive, single-feed active ingredient, difethialone. A formulation so advanced, it delivers improved results using half the amount of active ingredient needed by competing brands. So, in effect, you can do more with far less. Just consider these advantages:

- Lower per placement cost.
- Half the normal rate of active ingredient, yet controls more rodents per block.*
- Rodents can't taste the active ingredient; provides maximum palatability.
- Less active ingredient exposed to the environment.
- Uses the same antidote (vitamin K₁) as all other anticoagulants.

For more details on formulations, visit rodent-control.com or call 1-888-331-7900.

*Based on LD50; designed specially for use in Aegs™ bait stations. ©2002 LIPHATECH Inc.

PEST MANAGEMENT EQUIPMENT

Heavy-duty brass pump, rugged lightweight aluminium handle. Rods come in four 4 ft. sections, allowing a reach of up to 20 ft. **order code:** DUSTC

Dustick Scraper / Dustick Aerosol

Attachment Mini-Dust-R 1151-M: Small, manual duster. Holds approx. 14 oz. of dust. Extensions and extra tips.

order code: 1151M

Dust-R M 1152-A:

Manual duster. Holds 2 qts of dust. Extension and extra tip.

order code: 1152A

Electric Duster 2250:

Electrostatically charges dust/ flexible 2" nozzle. Holds 3 lbs. of dust. For large areas. **order code:** 2250

Injector Systems

Micro-Gen Micro-Injector: Hand-held aerosol crack/crevice injection fogger; electric operated.

Actisol® Compact Unit: Hand-held aerosol crack/crevice injection fogger; electric operated.

order code: ACT

Sprayers

B&G stainless steel sprayers: The industry standard. All include pump unit, tank, and hose unit. Tanks are made of rugged stainless steel.

See the B&G catalog supplement for a complete list of sprayers. All B&G accessories and parts are listed. Also see parts breakdowns on pages 39-40.

order code: N124S (18" wand), N124S18 (18" wand)

Birchmeier backpack sprayers:

Back-carried compressed air sprayers. Plastic tank.

10K: 10 liter tank. **order code:** 10K

15K: 15 liter tank. **order code:** 15K

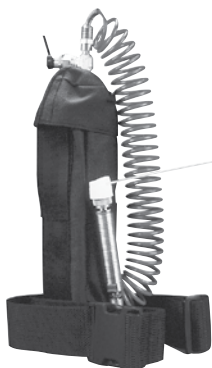

System III

System III: Comes with a belt, pouch, hose and applicator gun. With a double unit, a residual and ULV product can be applied with ease.

20-2300 single unit w/belt; 20-2301 single unit w/o belt; 20-2302 dual pack

order code: 530

B&G Equipment

B&G Equipment Corp.
Electric foggers. Molded plastic body with no seams; 1.5 gal. chemical tank.

My-Ti-Lite 2300:

Fixed flow rate of 9 oz./min.

order code: 2300

Ultra-Lite 2400:

Variable flow rate of 0-9 oz./min.

order code: 2400

Flexa-Lite 2600:

Variable flow rate of 0-18 oz./min.;
18" flexible hose.

order code: 2600

Whitmire/Micro-Gen

E-44:

High-capacity ULV with adjustable twin nozzles. Delivers 1.5-3.5 oz./min.; can cover up to 300,000 cubic feet. Optional hand cart allows portable operation; can also be wall mounted. 17 lb

G-77:

Dual-nozzle ULV with 8 H.P. electric start gasoline or propane engine. Delivers 2-12 oz./min, with 90% of droplets under 20 microns. Centrifugal compressor with flow meter and pressure gauge. 5 gal. chemical tank. Has optional skid mount.

Leatherman Tools

Leatherman Core:

19 tools in one, powerful pliers and easy to use locks. **Order code= LMC**

Leatherman c300

3" folding blade with nylon grip **Order code= C300**

Leatherman C302

3" stainless folding blade with aluminum handle. **Order code= C302**

Leathermen Micra

10 tools in this key chain size Leatherman
Order code= LMIT

Moisture Meter

Tramex Moisture Encounter: Moisture detection instrument that works on multiple materials, including timber and wood products, felt-roofing, plaster and brick. Soft rubber electrodes prevent scratches and other damage to the surface being tested.

order code: TRAMEX

Personal Safety Equipment

Comfo II: Nose-and-mouth respirator with replaceable cartridges. From Mine Safety Equipment. (CALL FOR SIZES AVAILABLE)

Replacement cartridges for Comfo

II and Ultra-Twin: Each respirator requires two cartridges per change-out. Cartridges now available for Hantavirus.

order code: 814923

Misc. Equipment

Seal Tite Plugs: Plastic Plug to conform to irregular surfaces to reduce vapor from termite chemical. 3/8" or 1/2"

Corks: Tapered, Size given is largest dimension. Order #1 for 3/8" hole, #3 for 1/2" hole, #4 for 9/16" hole, #5 for 5/8" hole, #6 for 3/4" hole. **order code: C#1, C#3, C#4, C#5**

Soak-Up: Absorbent material for spill control. 4 x 2.5#; 12 x 8 oz.
order code: SOAK

Blak-Ray ML-49: Portable model, with 6 watt bulb. Requires two standard 6 volt lantern batteries. 4.5 lbs.
order code: ML49

Rolatape: Precise wheel measurers. Outdoors MM 34; Indoors MM12
order code: MM30R, MM12

Nitrile Gloves: Chemical-resistant disposable gloves. 100/box
order code: NITL (large), NITXL (x-large)

TempVents: Opens and closes automatically to provide automatic ventilation. In Black, Brown or Grey.
order code: VBL, VBR, VGR

Gilbert Industries

Model 601T "The Don": Provides corner or flat wall mounting and a wider angle of attraction. 54.25" x 16" x 4.75"

order code: 601T

Model 1999GT/2000GT "Flying Venus":

Wall scone design for public areas; uses glueboard. Model 1999 has one attractant lamp, Model 2000 has two. Comes in polished or antique brass, black, or white. 24.375" x 8.75" x 6.25"

order code: 1999A-B-W, 2000A-B-W

4219 Glueboard: 17" x 5" glueboard.

24/box. **order code: 219B**

4220 Glueboard: 22" x 5" glue

24/box. **order code: 4220**

Model 711 "Flying Lion":

Large reflector design which increases fly response. Open top and front provide increased access area. 53.25" x 13.25" x 5.5"

order code: 711

Model 747 GT "Sticky Bear":

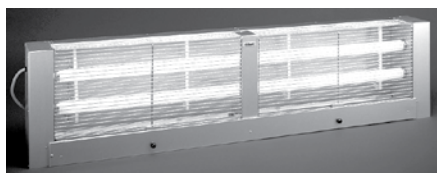

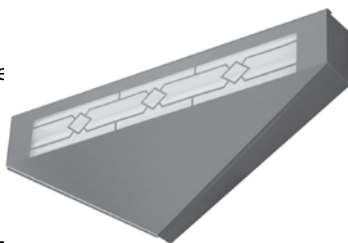

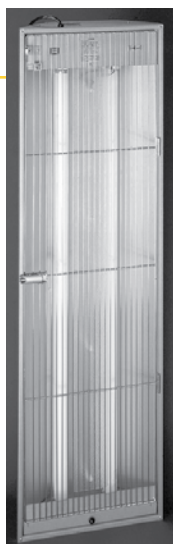

Model 711 with glueboard instead of electrocutor grid. 53.25" x 13.25" x 5.5". **order code: 747**

Model 705 "Night Hawk":

The trap of choice for night-flying insects in most shipping/receiving, warehouse, and large open areas. 53.25" x 13.25" x 8.75". **order code: 705**

Model 219GT "Sticky Tiger":

Portable unit with glueboard. 29" x 14" x 7.25". **order code: 219**

Whitmire/Micro-Gen Vector

Vector Classic: Industrial unit for food handling and other sensitive areas. 12" x 21.25" x 6.5". **order code: VEC**

Adhesive trapping board:
24/case

Replacement bulb set:
2/case

Vector Discreet: Small unit for use in public areas. 7" x 14". **order code: VECD**

Vector Plasma:

Sleek lightweight 72 watt light trap. **order code: VECP**

907 Vector Universal Glueboard: Fits Vector Classic, Vector Nova/SuperNova; Gilbert 219GT, 225GT, 747GT; and other light traps. 12/box. **order code: 907R**

Flashlights - Maglite

Mag Charger Rechargeable Flashlight

With 110V & automobile lighter socket adapter. **order code: MAGC**

Maglite 2 D Cell

Mini Maglite AA Cell.

order code: 2DC

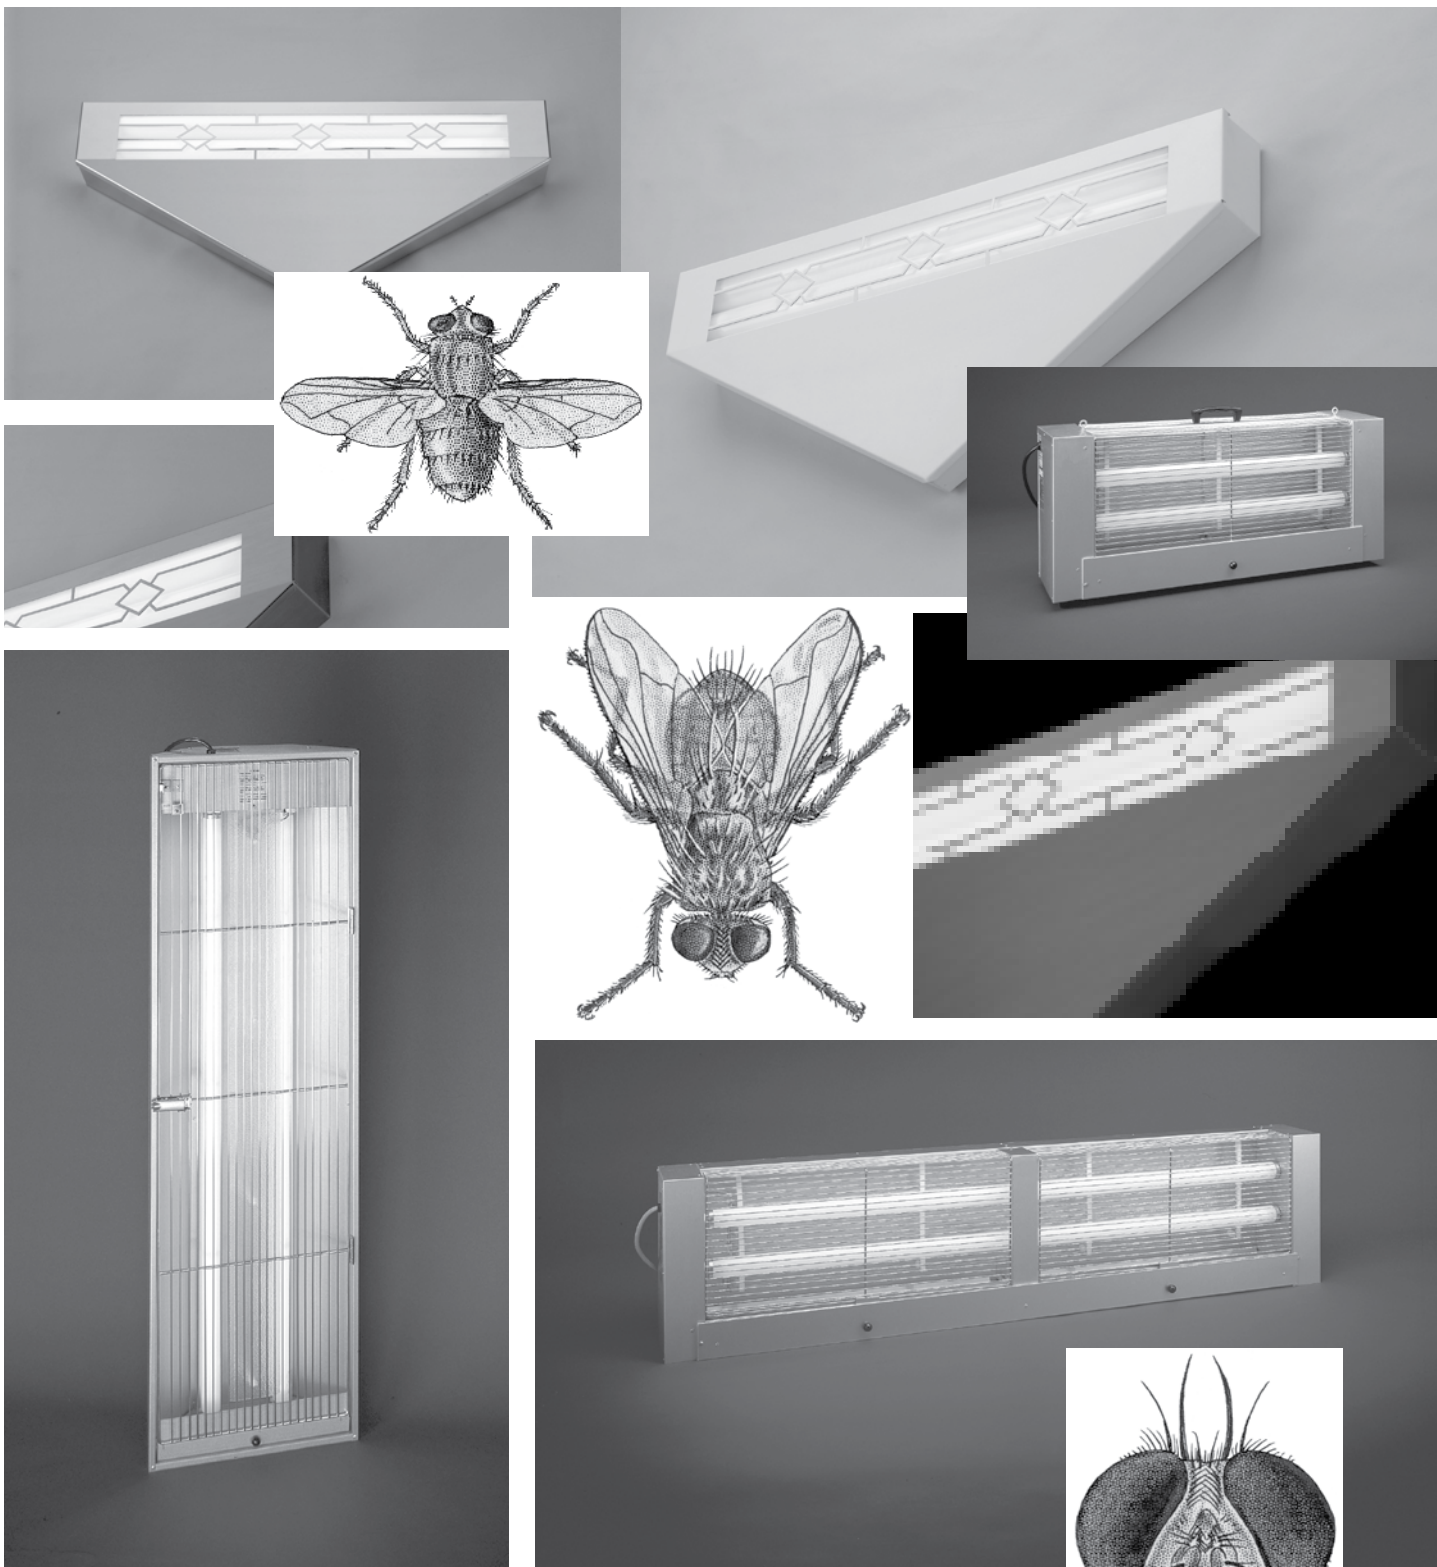

Bulbs & Spare Parts for each flashlight
Mini Mag Nylon Flap Holder
Maglite Ring Belt Holder

Scorpion LED

UV 14LED Flashlight urine tracker

Treating Devices

INDOOR APPLICATION

Sub-Slab Injector: Injects chemicals through block, concrete or floors made of wood over concrete. Flexible rubber seal locks in place to prevent splash-back. Tip shutoff assures leak-proof application. 14" or 24" long, with diameter of 1/2". See parts breakdown on page 38.

OUTDOOR APPLICATION

Versatool 480: Includes stainless-steel shafts which thread into a brass tee-handle valve body; brass valve trigger with a built-in locking pin; chemical resistant high impact grips; new locking foot seal which insures precise placement of dispersion tip and with foot pressure safely seals the injection hole. Comes with 7 different treating tips. See parts breakdown on page 38.

4-in-1 Tool: Treatment tool from Robco Spray Equipment. Includes Quick-Change Gun with multiple treatment rods (4", 24", 36", 39") and tips. Inc. slab injector.

Lateral Dispersion Tips: Can be used with Versatool or Sub Slab Injector to direct chemicals laterally. 4"; 6"; 8"; 12"; In 1/2" - 3/4" diameters.

PCS can build you a custom termite rig using your choice of the components in this section. Call us with your requirements!

Treating Devices (Continued)

PROBING RODS

Termite Probes/Ground Rodder: Extra heavy wall 1/4" pipe threaded with 1/4" MPT outside (one end) and 1/8" FPT (other end). Available in 42" lengths; 7" lengths with 1/4" MPT on both ends are also available.

TREATING TIPS

M2: Rodding or probing tip with terminal hole and four lateral holes. 1/8" MPT for threading in 1/4" soil probes.

order code: M-2T

SPRAY GUNS

JD9-C: Adjusts easily from mist to long-distance jet stream and any position in between. See parts breakdown on page 21.

order code: JD9

43H: Spraying Systems pistol grip valve with 21" extension.

43H A: Spraying Systems pistol grip valve with 12" extension.

FOAM MACHINES

Designed for easy operation, foam machines will fill voids, provide pin-point application, and reduce call-backs. Foam-applied termiticides are ideal for use in hard-to-reach areas like wall voids, cracks, sub slab, stoops, etc.

Richway Precision Foam Applicator: 6 gal. tank capacity, 15' applicator hose. Available with or without tool. Operates on 115 volt AC power.

Emergency Spill Control Procedures

There are four basic steps to follow for the proper handling of a pesticide spill. Good judgment and common sense must be used in determining which steps are taken first. The technician must assess the situation and determine what hazard poses the greatest threat. He/she should rectify the most serious situation immediately.

The four steps in spill control are as follows:

1. **Shut down of equipment and operations** - The technician should stop what he is doing and turn off any equipment he is operating. If the spilled pesticide is flammable, all sources of ignition (i.e., pilot lights, gasoline engines, etc.) should be shut off to prevent fire or explosion. If the equipment involved does not belong to you, the owner and/or operator of the equipment may be enlisted to help shut off the equipment.
2. **Containing and controlling the spill** - Attempts should be made to stop further leakage from the pesticide container or tank. Next, the applicator should contain the size of the present spill to prevent it from spreading to adjacent areas especially storm drains, wells, water systems, and waterways. Pesticide spills should never be hosed down with water - this will only spread the contamination. Technicians should use the materials in their spill control kits to contain the spill by encircling the area with spill control pillows, a dike of sand, absorbent materials, sand snakes, or as a last resort, soil or rags.

Once contained, the spill should then be covered. Absorbent material like Soak-Up should then be used if the spill is a liquid pesticide. If the spill is a dry material, polyethylene or plastic tarpaulins should be used to cover the pesticide.

3. **Provide first aid assistance to affected individuals** - There may be an occasion when the public is exposed to pesticides due to a chemical spill. Follow the pesticide label in providing first aid assistance. Pesticide labels and MSDS's should be provided to health personnel providing medical assistance to affected persons. Infotrac (800) 535-5053 can also provide medical information.

Medical assistance should be sought when needed. Facts concerning the toxicity of the material and the extent to which the individual has been exposed will aid in determining the threat to health.

The health needs of the technician must be addressed as well. First aid should be administered when necessary and the proper protective clothing should be worn by personnel when working around the pesticide spill.

People present at the scene of the accident should be advised to stay clear of the pesticide spill. Roping off the area and posting warning signs is one method of notifying bystanders of the hazards associated with the spill. In a structure where only a few individuals are present, verbal communications with the occupants is probably the best method of notification. In either case, it is important to protect the public from possible pesticide exposure.

4. **Clean-up and Decontamination** - The manufacturer should be consulted for clean-up and decontamination procedures of pesticide spills. The branch office will make the necessary contacts. Infotrac (800) 535-5053 can also be consulted for information. Infotrac provides information on clean-up of large pesticide spills due to transportation accidents or warehouse fires.

All absorbent used for liquid spill clean-up must be collected and placed in a leak-proof container. Plastic bags have been included in the spill control kit for this purpose. The container should then be properly labeled and returned to the office for disposal or recycling. Soil or other materials used for diking spills must also be collected and returned to the office for disposal.

Dry pesticides should be collected and placed in heavy duty plastic bags or drums. Again, containers must be marked and returned to the office for disposal or reuse.

Once the bulk of the pesticide spill has been removed, the surfaces affected by the pesticide spill must be decontaminated per the manufacturer's directions. Decontamination procedures may vary depending on the type of surface involved. If an affected material or surface cannot be decontaminated adequately, it must be collected and placed in a sealed, leak-proof drum. All drums must be labeled and disposed of in a hazardous waste disposal facility.

Technicians should follow these steps in order to prevent pesticide spills from occurring:

1. Use only pesticide application equipment that is in good working order. Check equipment before it is used for faulty hoses and parts.
2. Mix all pesticides outside near your vehicle. Fill all application equipment on the exterior of the structure. Do not carry any pesticide concentrates into your

customer's building. If a concentrate must be taken in, it must be kept in a locked service kit. Only single use containers or the smallest size package may be carried.

3. Mix pesticides for power spraying units at each job. Mix only the amount needed for that job. Travel from job site to job site with the power spraying unit tank empty when possible.
4. Store all pesticides in containers that are in sound condition. Transfer pesticides out of leaking containers immediately.
5. Drive defensively. Pesticide spills can result from an overturned power spraying truck or service vehicle.

Comprehensive Pest Control Is More Than Just Products.

Sure, Syngenta has superior products. But when you're an industry leader, more is expected. Like developing the "next generation" of innovative technologies. And sponsoring research and educational initiatives that will move the industry forward. We're doing all of that—and more.

Contact Pest Control Supplies at 1-800-821-5689 to learn more about Syngenta products.

TURNS THE FIRST ROUND INTO LAST CALL.

The First Gel That Attracts Like a Liquid.

- New Prescription Treatment® 388B Advance® Ant Gel Bait is one of the most attractive ant gel baits you can buy.
- Patented inert ingredient absorbs the sweet liquid with just enough force to maintain its shape while keeping the liquid accessible to ants.
- Because it is a gel it is easy to apply with our PT® 345 Applicator gun for proper dosing where ants are active.
- 5.4% borax allows workers time to deliver the bait to other workers, reproductives, larvae and queen(s).
- As part of the Prescription Treatment Advance line of bait products supported by Whitmire Micro-Gen, you can trust it to work in your ant service protocols.

NO CRAWBACKS. NO CALLBACKS.

Mosquito Control's Most Potent One-Two Combo.

Mavrik® knocks 'em down.

- Controls adult mosquitoes around buildings and homes.
- Contains tau-fluvalinate, a pyrethroid that provides quick knockdown of pests like mosquitoes.
- For use only on ornamental plantings, gardens, plantscapes, trees, shrubs and outside surfaces, or around buildings (perimeter treatment).
- Safe for more than 200 ornamental plant species.

Pre-Strike™ prevents 'em from ever getting back up.

- Prevents mosquito larvae from becoming breeding, biting adults.
- Contains (S)-Methoprene, a proven insect growth regulator.
- Provides up to 21 days of control in standing water.
- Controls mosquito larvae that can become vectors of West Nile virus as adults.
- Ideal for bird baths, flowerpots, ornamental fountains, gutters, water gardens, rain barrels, pool covers, water troughs, puddles and other water-holding receptacles.

Terms

Our terms are net 30 days from date of invoice, not to exceed predetermined credit limit established on credit application. A 2% per month (12% per annum) fee will be charged on all invoices past due. All quoted pricing is in U.S. dollars unless otherwise stated.

Prices

Prices may be subject to change without notification.

Sales Tax

Sales tax collected from destination address. Sales tax exempt sales require proper documentation.

Method of Payment

PCS accepts cash, checks, Master Card, Visa, American Express, and Discover cards.

Warranty Information

Manufacturers warranty only. PCS is not liable for damage resulting from handling, storage, or misuse of products.

Terms of Delivery

Local delivery at no charge, \$100 minimum. Check your local office for prepaid minimums. Granules will be shipped FOB our warehouse.

Method of Delivery:

The carrier for your shipment will be selected by PCS unless you specify a preference when placing your order.

Damaged Freight:

Shipments arriving damaged or with missing items should be noted on the freight bill before signing, or on the UPS/FedEx delivery record with a legible signature of the driver marking the delivery and an explanation of the problem. Where shipment is made freight collect, a claim should be filed by the consignee. Copies of the signed delivery record should be returned to PCS on prepaid freight shipments so that we may file a claim and credit your account.

Restricted Use Pesticides:

In order to receive and use a product designated as restricted use, an applicator must be certified in the appropriate category established by the designated state. If the product is for resale the purchaser must be a dealer for restricted use pesticides. To purchase these materials, we must have the applicator's current certification number, type of license, categories and expiration date on file. Restricted Use products are listed as such in the catalog. Note that the restricted use status of products will vary from state to state. Please check with your state regulatory agency for the latest list of restricted use pesticides in your state.

Returns

Special ordered items cannot be returned. If this applies, you will be told when you place the order.
